▲ Data requested but not available from jurisdictional agency.

* Data reflects only UCSB PD activity on public property. Additional data was requested but not available from jurisdictional agency. In 2008 and 2009 Public Property was defined as all of the unincorporated community of Isla Vista for purposes of crime reporting.

** As of 2011, only thefts that occur inside the residence halls are counted as campus residence hall thefts.

♦ 1 non-campus hate crime characterized by race bias was reported; the reporting jurisdiction did not indicate the category of crime.

Please Note:

⚙ In recent years, the Department of Education (DOE) clarified the definition of public property. As of 2010, UCSB is no longer including all of Isla Vista in the public property reporting category; UCSB is only reporting statistics that meet the limited DOE definition of public property. For information on how Clery Act crimes are defined, please access the U.S. Department of Education Campus Security Web site at: <http://www.ed.gov/admins/lead/safety/campus.html#handbook>.

UCSB makes a good faith effort to obtain public property data from local law enforcement agencies. This information is not always readily available or maintained by other agencies in accordance with the Clery Act definitions and/or requirements.

Student organizations include only fraternities, sororities and co-ops located off-campus; data provided by the jurisdictional agency.

Additional data on reported crimes in Isla Vista not reflected in this report are maintained and available from the Isla Vista Foot Patrol.
